

MIRACLE A. EZEH

Web & UI Developer | Frontend Engineer | React Developer

ABOUT ME

Frontend Developer with 4 years of experience delivering web applications for teams of up to 200+ staff and 1,000+ users. Skilled in React, Next.js, TypeScript, and Tailwind CSS , with a proven track record of optimizing page load times, improving SEO via SSR/SSG, and building reusable component libraries to streamline development workflows.

EDUCATION

BSc Computer Science | Federal University of Lafia

WORK EXPERIENCE

Harley Innovations Hub | Jan 2026 - Present

Frontend Developer and Frontend Facilitator

- Architect and develop internal tools and learning platforms using React, Next.js, and TypeScript to optimize digital course delivery.
- Build reusable component libraries and integrate RESTful APIs to ensure seamless data flow and UI consistency.
- Deliver hands-on training and design comprehensive curricula covering React, state management, and modern Git workflows for engineering students

Dennic Electrical Construction Comp | June 2025 – Dec 2025

Frontend Developer & IT Officer

- Developed a responsive internal tracking and documentation platform using React and Tailwind CSS, standardizing record retrieval for staff.
- Optimized frontend layouts for mobile and tablet views, ensuring field engineers could access technical documents without workflow disruption.
- Managed local IT infrastructure, configured office networks, and provided rapid hardware/software technical support to minimize company downtime.

Osmovic Media April 2024 – April 2025

Junior Frontend Developer

- Built and optimized responsive web applications using React, Next.js, and TypeScript, delivering 3 client-facing projects that boosted user engagement.
- Implemented SSR and SSG for high-traffic landing pages, improving page load speeds and SEO rankings to increase inbound traffic.
- Developed accessible UIs using Chakra UI and Tailwind CSS, reducing frontend build times for new modules by over 20 hours per sprint.
- Integrated RESTful APIs with robust error handling and data caching, improving application stability for hundreds of active users.
